

BENJAMIN XIAO

Sunnyvale, CA | 4158238407 | benjamin.y.xiao@gmail.com | linkedin.com/in/benjaminxyiao | <https://github.com/SpecCRA>

Data Scientist with 3 years of experience across gaming and biotechnology with focus in analytics and machine learning. Skilled in Python, SQL, R, and data visualizations. Developed automated ETL pipelines interactive dashboards and metrics for data quality review that reduced data review time by 50%. Adept at applying data science solutions to existing business problems.

SKILLS

Python | R | SQL | Git | Deep Learning | Large Language Models | Machine Learning | Data Visualizations

PROFESSIONAL EXPERIENCE

Data Scientist *Jun 2022 - Present*
BioMarin Pharmaceuticals Inc. San Rafael, CA

- Engineered automated ETL pipelines and conformance frameworks to standardize external datasets, ensuring data integrity and regulatory compliance
- Collaborated with cross-functional teams to deliver data visualizations and quality review solutions aligned with project timelines and clinical objectives
- Established vendor performance KPIs and tracking systems to identify data delivery issues and drive continuous improvement

Data Scientist *Sep 2021 - Oct 2021*
Triumph Labs San Francisco, CA

- Quantified if games are predominantly skill/luck with research, development, simulation modeling in *Python* successfully classifying chess as skill based and roulette as luck based
- Monitored user engagement with bespoke KPIs (time played per player session) and reporting dashboards using player performance scores and device telemetry data to learn about player behavior

Professional Poker Player *Jan 2010 - Nov 2018*
Freelancer San Francisco, CA

- Managed 6+ concurrent high-stakes tables, demonstrating advanced multitasking and rapid decision-making under pressure to optimize performance
- Analyzed hand history data to identify negative equity patterns and optimize strategic decisions, maximizing expected values and profitability

PROJECTS

Automated Research Data Labeling *Jul 2025*

- Built multimodal data labeling pipeline using *Python* to scrape, clean, and integrate Instagram content (text, images, videos) for LLM political classification models, collaborating with a social science researcher to define labeling schemas and translate research requirements into technical specifications

Custom Text-to-Speech *Aug 2024*

- Developed *Python*-based audio processing pipeline to extract, isolate, and enhance vocal tracks from Twitch videos, leveraging voice cloning techniques to train custom text-to-speech models from minutes of sample audio

EDUCATION

MS Data Science - Major in Machine Learning and AI *Apr 2019 - Dec 2021*
Northwestern University Evanston, IL

BS in MCD Biology *Jan 2011 - Aug 2013*
University of California, Santa Cruz Santa Cruz, CA
